

FALL TAG ACTIVITY DAYS 2019

On September 25, 2019 and October 24, 2019, the Lawrence County Educational Service Center hosted our annual “Fall TAG Activity Days” for the talented and gifted students in Lawrence County.

The day 5th/6th Grade Activity Day was centered around the Engineering Technologies Programs at Shawnee State University. Through the guidance of Dr. Adam Miller, the department chair, students visited and participated in activities in the Computer Science Program, the Electromechanical Engineering Program, the Computer Drafting Program, and the Design and Gaming Program.

Our annual “Fall TAG Activity Day” for the 7th and 8th grade talented and gifted students in our Lawrence County schools. With the direction of Dr. Richard Begley, the students visited the Arthur Weisberg Family Applied Engineering Complex on the campus of Marshall University. This day was centered around engineering technology and the students heard information and demonstrations on the many engineering careers offered at Marshall University. Students spent time learning about the Computer Science Program, Safety Engineering Program, Biomedical Engineering Program, and the Civil Engineering Program at Marshall University.

*****The TAG Fall Activity Days not only provide our talented and gifted students with an opportunity to get together with other students from around our county, but most importantly, it provides them with high level, real hands-on, “outside of the classroom learning” that is fun and exciting.***

We hear at the ESC were privileged and excited to get to provide this opportunity to our county students.
